**Dr Jane Wilkinson. GP and Menopause Specialist.**

We all have quite strong thoughts about menopause and HRT, but how much do we really know? Research has moved on over the years and many of our clients come to our clinics asking for advice and help as they suffer problems related to hormones and menopause.

Dr Wilkinson will talk to us about current research, treatments and educate us on the facts surrounding menopause and HRT.

**Brendan Veale. Parasite Expert.**

Another subject we are all very curious and confused about, what we see going down the tube. Is it a parasite, or is it something else? Brendan will share his huge knowledge of parasites, with plenty of photos.

**Following the success of last year, we are also going to be hosting workshops.**

Again we are discussing topics that will help you in your practice and our theme is **'Consultation not Litigation.'**

We will be discussing things such as relative contra-indications, Drug interactions and consultation forms. (Subject to alteration as we may include other topics.)
